

Cutting Instructions- Snail's Trail Block

6" Finished

Color 1:

- (1) 1 ¼" square
- (1) 2 11/16 square, cut in half diagonally twice to make quarter square triangles (only one will be used)
- (1) 2 3/8 square, cut in half diagonally once to make half square triangles (only one will be used)
- (1) 4 3/16 square, cut in half diagonally twice to make quarter square triangles (only one will be used)
- (1) 3 7/8 square, cut in half diagonally once to make half square triangles (only one will be used)

Color 2:

- (1) 1 ¼" square
- (1) 2 11/16 square, cut in half diagonally twice to make quarter square triangles (only one will be used)
- (1) 2 3/8 square, cut in half diagonally once to make half square triangles (only one will be used)
- (1) 4 3/16 square, cut in half diagonally twice to make quarter square triangles (only one will be used)
- (1) 3 7/8 square, cut in half diagonally once to make half square triangles (only one will be used)

Background

- (2) 1 ¼" squares
- (1) 2 11/16 square, cut in half diagonally twice to make quarter square triangles (only two will be used)
- (1) 2 3/8 square, cut in half diagonally once to make half square triangles
- (1) 4 3/16 square, cut in half diagonally twice to make quarter square triangles (only two will be used)
- (1) 3 7/8 square, cut in half diagonally once to make half square triangles

8" Finished

Color 1:

- (1) 1 ½" square
- (1) 3 3/16 square, cut in half diagonally twice to make quarter square triangles (only one will be used)
- (1) 2 7/8 square, cut in half diagonally once to make half square triangles (only one will be used)
- (1) 5 3/16 square, cut in half diagonally twice to make quarter square triangles (only one will be used)
- (1) 4 7/8 square, cut in half diagonally once to make half square triangles (only one will be used)

Color 2:

- (1) 1 ½" square
- (1) 3 3/16 square, cut in half diagonally twice to make quarter square triangles (only one will be used)
- (1) 2 7/8 square, cut in half diagonally once to make half square triangles (only one will be used)
- (1) 5 3/16 square, cut in half diagonally twice to make quarter square triangles (only one will be used)
- (1) 4 7/8 square, cut in half diagonally once to make half square triangles (only one will be used)

Background:

- (2) 1 ½" squares
- (1) 3 3/16 square, cut in half diagonally twice to make quarter square triangles (only two will be used)
- (1) 2 7/8 square, cut in half diagonally once to make half square triangles
- (1) 5 3/16 square, cut in half diagonally twice to make quarter square triangles (only two will be used)
- (1) 4 7/8 square, cut in half diagonally once to make half square triangles

10" Finished

Color 1:

- (1) 1 ¾" square
- (1) 3 11/16 square, cut in half diagonally twice to make quarter square triangles (only one will be used)
- (1) 3 3/8 square, cut in half diagonally once to make half square triangles (only one will be used)
- (1) 6 3/16 square, cut in half diagonally twice to make quarter square triangles (only one will be used)

(1) $5 \frac{7}{8}$ square, cut in half diagonally once to make half square triangles (only one will be used)

Color 2:

(1) $1 \frac{3}{4}$ " square

(1) $3 \frac{11}{16}$ square, cut in half diagonally twice to make quarter square triangles (only one will be used)

(1) $3 \frac{3}{8}$ square, cut in half diagonally once to make half square triangles (only one will be used)

(1) $6 \frac{3}{16}$ square, cut in half diagonally twice to make quarter square triangles (only one will be used)

(1) $5 \frac{7}{8}$ square, cut in half diagonally once to make half square triangles (only one will be used)

Background:

(2) $1 \frac{3}{4}$ " squares

(1) $3 \frac{11}{16}$ square, cut in half diagonally twice to make quarter square triangles (only two will be used)

(1) $3 \frac{3}{8}$ square, cut in half diagonally once to make half square triangles

(1) $6 \frac{3}{16}$ square, cut in half diagonally twice to make quarter square triangles (only two will be used)

(1) $5 \frac{7}{8}$ square, cut in half diagonally once to make half square triangles

12" Finished

Color 1:

(1) 2" square

(1) $4 \frac{3}{16}$ square, cut in half diagonally twice to make quarter square triangles (only one will be used)

(1) $3 \frac{7}{8}$ square, cut in half diagonally once to make half square triangles (only one will be used)

(1) $7 \frac{3}{16}$ square, cut in half diagonally twice to make quarter square triangles (only one will be used)

(1) $6 \frac{7}{8}$ square, cut in half diagonally once to make half square triangles (only one will be used)

Color 2:

(1) 2" square

(1) $4 \frac{3}{16}$ square, cut in half diagonally twice to make quarter square triangles (only one will be used)

(1) $3 \frac{7}{8}$ square, cut in half diagonally once to make half square triangles (only one will be used)

(1) $7 \frac{3}{16}$ square, cut in half diagonally twice to make quarter square triangles (only one will be used)

(1) $6 \frac{7}{8}$ square, cut in half diagonally once to make half square triangles (only one will be used)

Background:

(2) 2" squares

(1) $4 \frac{3}{16}$ square, cut in half diagonally twice to make quarter square triangles (only two will be used)

(1) $3 \frac{7}{8}$ square, cut in half diagonally once to make half square triangles

(1) $7 \frac{3}{16}$ square, cut in half diagonally twice to make quarter square triangles (only two will be used)

(1) $6 \frac{7}{8}$ square, cut in half diagonally once to make half square triangles
