PLATINUM LIVE COURSES While it may not be possible to have George in the shop with you, here’s the next best thing; a LIVE 6-8 week woodworking class that you take with George online. Prior to the class you’ll receive a project plan, along with a list of the tools and materials you need for the project. We’ll all start the project together, and the class will meet weekly via a LIVE video event to work through specific aspects of the project. What a great way to improve your woodworking skills, and interact with George and other woodworkers.			3
EXCLUSIVE PLANS WITH VIDEOS A comprehensive woodworking plan is great, but it leaves you figuring out how to actually build the project. Our Platinum plans take care of that for you. You’ll receive a fully dimensioned project plan, plus a step-by-step video that shows you how to build the piece. As you build your library of Platinum plans you’ll not only have great projects at your fingertips, but you’ll also get tons of great woodworking tips and tricks that are taught in the companion video. Now, that’s a winning combination.			2
